

SEEK YAHWEH ON PROPHETS

Message to the Church

May 9, 2022

YAHWEH SAYS THIS TO THE WHOLE CHURCH:

Susanna, the way that you go is not an easy way. People think they can wish they are a prophet, and it just happens. But no natural church way can make a person take on prophet traits. These prophet traits stem from Yahweh. A released prophet will have a continual surging without restraint for the workload given. The novice prophet is not in the fullest placement, and they take in surgings of power when Yahweh yields it but only in small increments. There is no actual office placement yet, and the novice does not carry the weight of the mantle, which means that they do not have the backing to invoke Yahweh.

The prophet must be released to do My work. The novice is not a released servant but will have training that feels to that servant as if they walk in the actual work. Their spiritual engagement will feel like actual assignments out in the field. But there is a grave problem: Those who know the novice may put them on a platform and tell them to walk in the fullness when they are not ready.

Waiting for the release from Yahweh to move out in the work as a real prophet is a hard standing for the novice because many beg their leaders to see them as they will be when they take on the fullness of the office. And here is what some do not understand: Yahweh gives those in the novice cave training plan real messages that may later become active and pushed forward. But still, the novice must wait for Yahweh to impart the fullest office surging so there will be a backing to do the office work.

Many mistreat novice prophets because they are not walking in their spiritual licenses, and the mantle's full potential has not manifested. The best counsel to say to the Church of Yahweh: Learn where your prophets are in their sphere and training under Yahweh and view them through Yahweh's way due to how a novice may not have a way to exude a surging. Don't put them on a stage until you know they are released.

If you encounter a person learning the prophet's office, seek Yahweh concerning dealing with their work, calling, and training plan. Then wait on Yahweh to tell you what to do with that person. Seek Yahweh on how to handle their messages and training. But do not automatically call them a false prophet. Let Yahweh gauge them, and you follow accordingly.
